

Care Net IMPACT REPORT SAVING LIVES, HEALING HEARTS

YOU'RE making an incredible impact on life! With your support, Care Net reaches out to abortion determined women and men with truth and hope, empowering many to CHOOSE LIFE! Here's a quick glance at the difference you have made.

IN THE PAST SIX YEARS **388,691** LIVES SAVED!¹
This impact is among clients visiting a Care Net center who are at risk for abortion.

PREGNANCY CENTERS

Approximately 1,180 Care Net affiliated pregnancy centers welcome those facing unplanned pregnancies with life-affirming compassion, hope, and help. Every year about 30,000 people volunteer at these pregnancy centers. And since 2009, there has been a 20 percent growth in the number of Care Net centers providing free ultrasounds to their clients.

HOW HAVE WE SERVED IN THE LAST SIX YEARS?¹

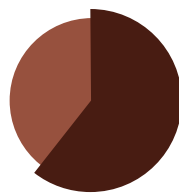

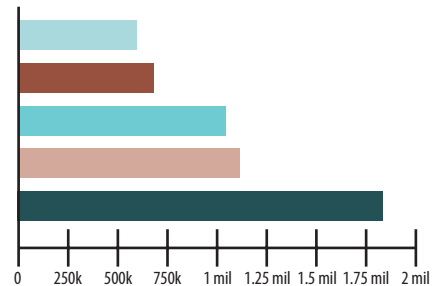

8 out of 10 women who are considering abortion when they visit a Care Net Pregnancy Center

CHOOSE LIFE

for their unborn children.

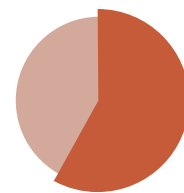

HIGHEST AGE RISK: 20's

579,322 free ultrasound scans
723,597 received parenting support and education
More than **1 million** people heard the Gospel
1.1 million people received material resources
1.8 million free pregnancy tests

57%

of abortions are performed on women ages 20-29²

55%

of Pregnancy Center Clients are ages 20-29¹

PDL reaches the MOST ABORTION DETERMINED

PREGNANCY DECISION LINE

REACHING THOSE MOST AT RISK

Care Net operates the Pregnancy Decision Line (PDL) — the only national call center and Internet website designed to reach people considering abortion with immediate pregnancy decision coaching, information, and referrals.

WHO WE SERVE

74%

of PDL contacts are at risk for abortion.

Almost 85,000 visitors to the website have been a result of targeted keyword advertising supported by donations.

1. Statistics come from internal data collection and the 2008-2013 Annual Statistics from Care Net affiliated pregnancy centers. Number is based on the "last stated intent" of women at risk for abortion who visit a center.

2. Jones RK, Finer LB, and Singh S, Characteristics of U.S. Abortion Patients, 2008, New York: Guttmacher Institute, 2010.
